LIFESTYLE TECHNOLOGY

ELEVATING THE ART OF LIVING WELL

# TECHNOLOGY DESIGN FOR LIFE'S MOST IMPORTANT SPACES AND MOMENTS

Since AHT Global was founded in 1996, our mission has been to design and install technology systems that elevate the way our clients live, work, travel, and play. From premiere residential properties to exquisitely crafted super-yachts, every project is one-of-a-kind, and every engagement is an opportunity for us to create a bespoke solution that achieves the highest levels of quality, reliability, and artistry. Our team is comprised of the best and brightest technicians, programmers, and engineers, and we utilize only the finest products and systems available.

We invite you to explore some of the ways AHT Global can help you create the perfect environment for your unique lifestyle.

# THE PERFECT ENVIRONMENT FOR YOUR UNIQUE LIFESTYLE

Solutions crafted by AHT's skilled team of professionals infuse premier homes with style, grace, and superior performance both inside and out. It is a transformation that comes to life before your eyes.

WIFI ACCESS POINT

TEMPERATURE SENSOR

TOUCHSCREEN

LIGHTING KEYPAD

ALEXA (VOICE CONTROL)

IPAD

ART AND VIDEO WALL

SURROUND SOUND SPEAKERS

CEILING MOUNTED FLAT TV

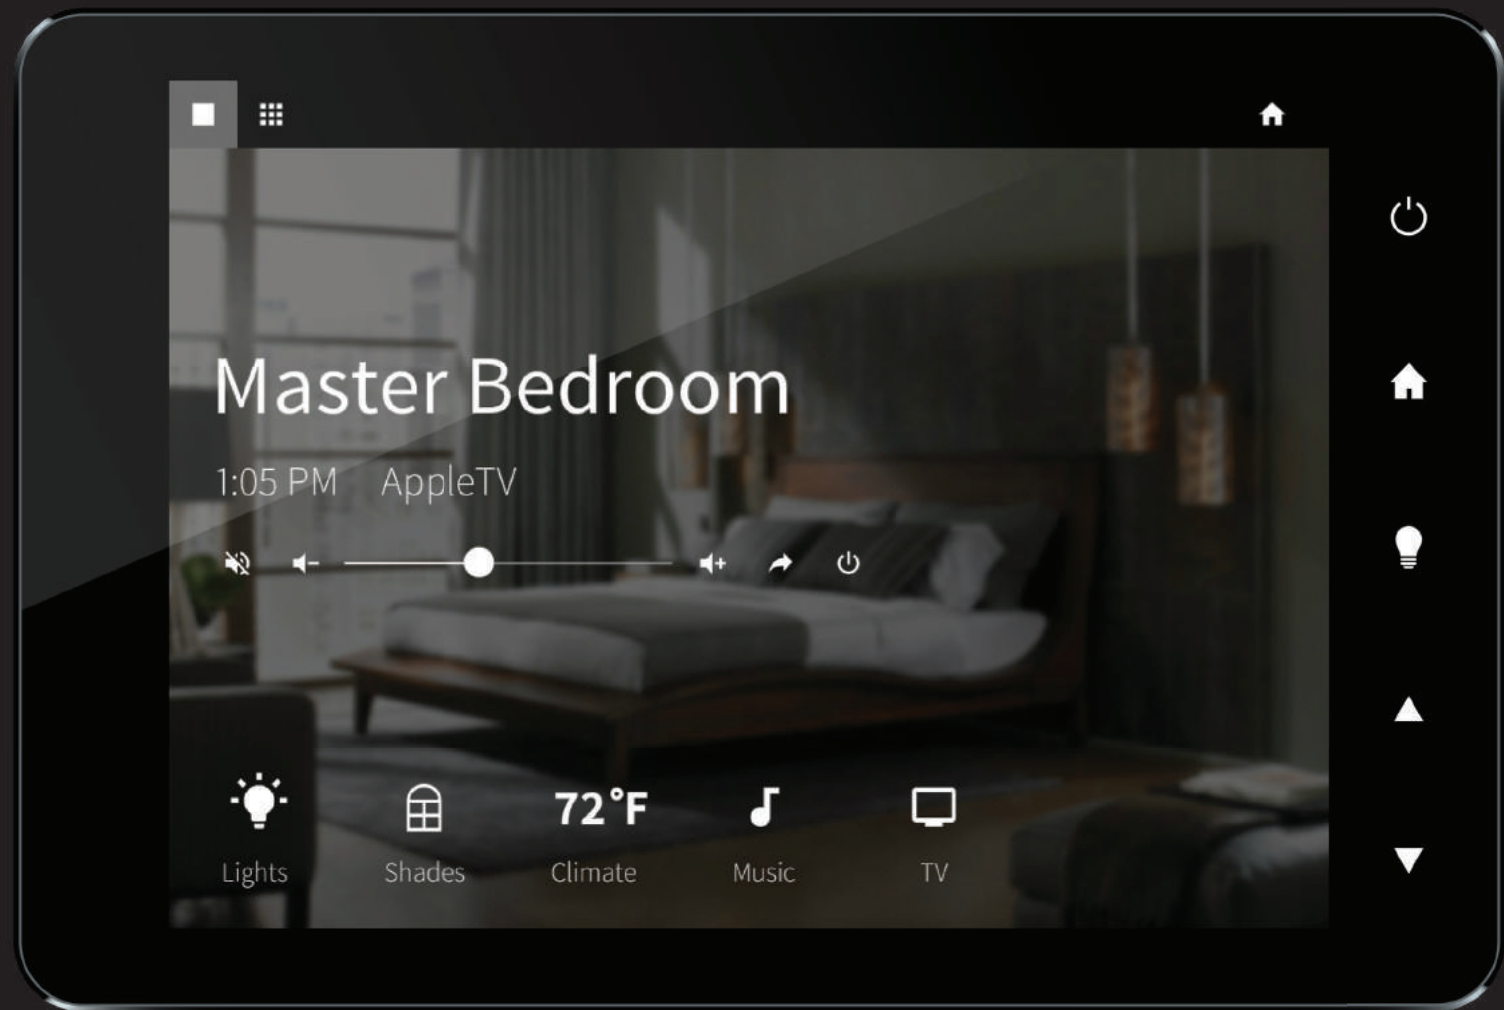

SECURITY CAMERA

MOTORIZED SHADING

# BESPOKE SOLUTIONS & THE FINEST LIFESTYLE TECHNOLOGY BRANDS

Distinctive lighting, theater-quality media rooms, programmed climate control, and state-of-the-art security, are among countless details that bring greater beauty and ease to everyday living and special occasions.

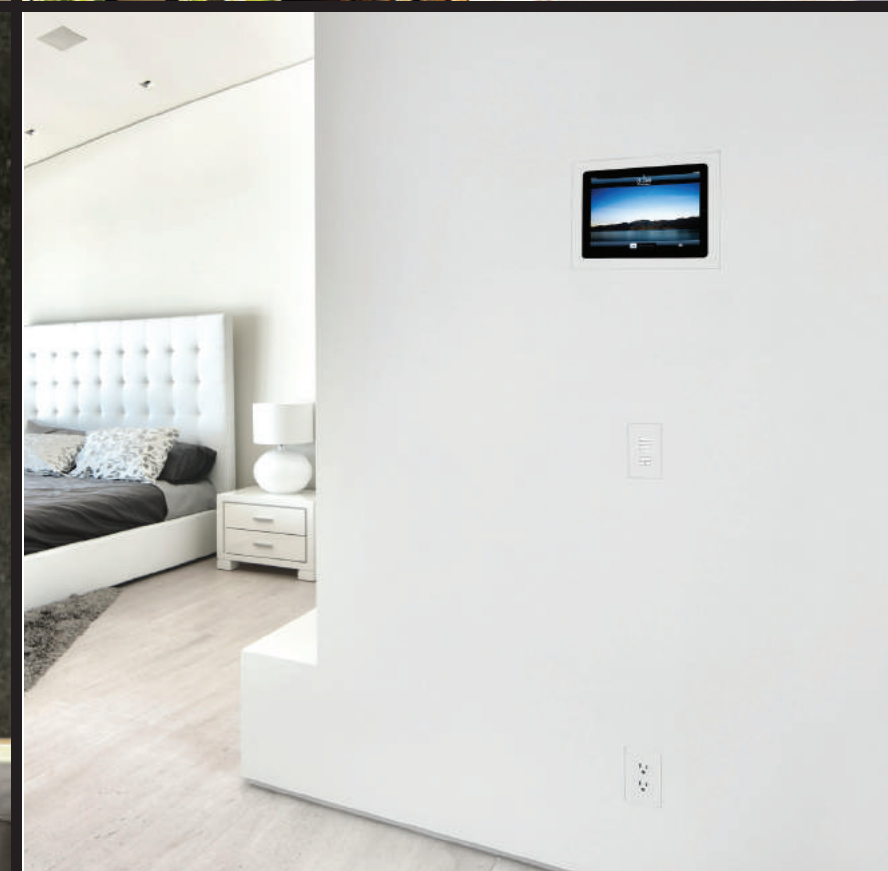

## THE FINE ART OF SIMPLICITY

AHT has earned a stellar reputation for many aspects of our work, including custom interfaces that are brilliantly easy to use. A touchscreen streamlines access to every system and device in your life.

# IMPECCABLE WORKMANSHIP

Every member of our team takes pride in designing, building, and installing lifestyle technology systems that reach the highest levels of quality and craftsmanship. We are only satisfied when our work is elegant, ideally suited to its environment, and perfectly executed.

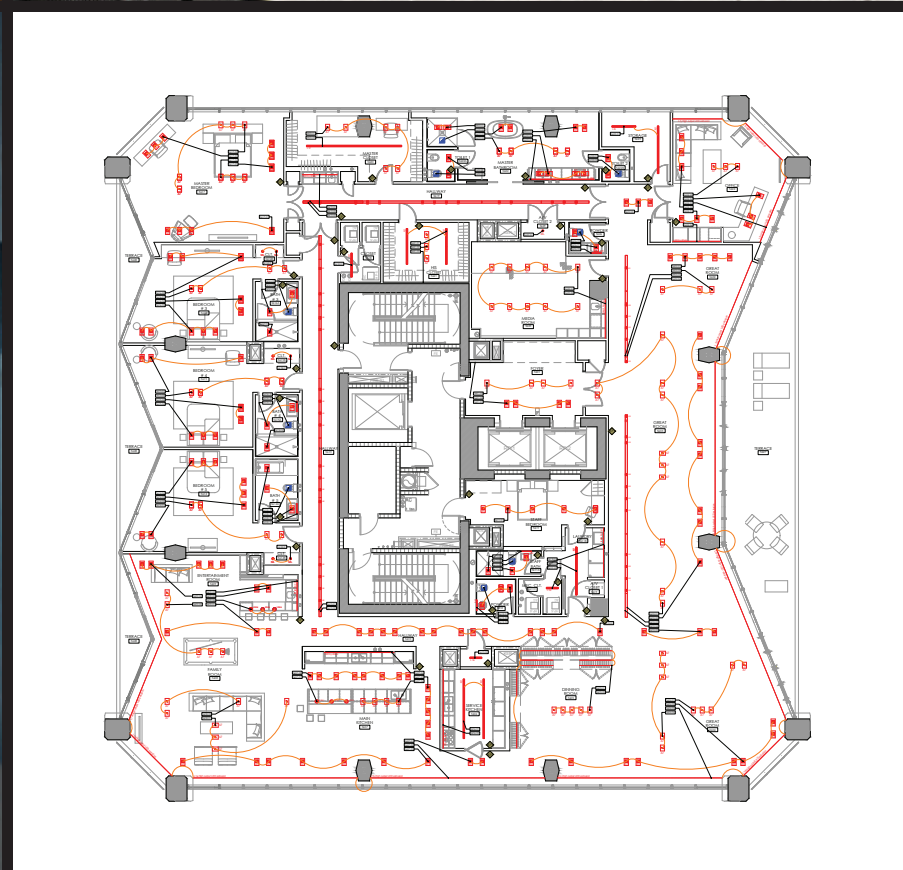

## DESIGN, ENGINEERING & PRODUCT EXPERTISE

AHT's expertise in design, low-voltage engineering, and production of complex projects for premier properties is what sets us apart. We create, document, and implement fully detailed plans.

## SEAMLESS MANAGED CARE

AHT's managed care remote servicing ensures that all of your home's systems are continually monitored digitally and any issues are immediately addressed. When possible, issues are resolved remotely and when necessary, we quickly send the appropriate technician for an onsite resolution.

## CAPABILITIES, PRODUCTS & SERVICES

AHT's capabilities and services encompass every aspect of lifestyle technology. Aesthetics, security, comfort, communications, and entertainment can all be elevated, optimized, and adapted to meet each client's particular requirements and create their ideal living environment.

## AUDIO / VIDEO

Integrated audio/video controls let you play the right music for the moment in all connected living spaces and allow you to watch recorded programs from your smart phone, laptop, or tablet either at home or away.

- Home theaters and media rooms
- Video walls
- Video / audio distribution
- Listening rooms

## HOME THEATER DESIGN

A beautifully designed and precision-engineered home theater can be fully customized with handcrafted recliners and sofas, IMAX screens, motorized sliding panels and screens, and sound-proofing, among many other details.

- Automated lighting, sound, and curtain presets provide an authentic cinema experience
- A wide range of custom seating options
- Seamless integration of all your music and movies in an award-winning interface

## SURVEILLANCE AND SECURITY

Safety and security are the paramount concerns in every home. In addition to preventing or deterring theft, systems and programming features can safeguard various living spaces against power outages and certain weather conditions.

- Camera surveillance systems
- 24-hour surveillance options to monitor every door, window, and fire escape
- Door and window sensors can detect intrusion and trigger alerts, messages, or actions
- Automated exterior and interior lights to help deter theft and burglary

## LIGHTING

Enjoying the perfect ambience is simple with pre-programmed lighting and complementary systems. With just one touch, lights, motorized shades, and music are just right for an elegant dinner, movie night, or a lively cocktail party.

- Directional spotlights or display lighting for architectural features and artwork
- Wall plates, dimmers, and various controls, including remote and keypad
- Programming for times of day or special events
- Sensor automation

## MOTORIZED SHADES

Motorized window shades not only provide the luxury of convenience, but also support energy efficiency by communicating with other smart home systems to reduce energy usage while keeping the temperature comfortable.

- Can adapt to the sun's position, reducing need for electric light
- Can be pre-set to an astronomic time clock for automatic adjustment
- Control options include keypads, IR remote controls, and wireless tabletop controls
- Can be programmed for various pre-determined states, including when the house is unoccupied

## COMMUNICATIONS

The foundation of every modern home is an information technology network that supports all of the demands of your systems, including critical communications devices such as telephones, smart phones, computers, and intercoms.

- Phone systems
- Intercoms
- Video conferencing

## CLIMATE CONTROL

Discreet sensors and intelligent networking ensure the optimal temperature and humidity levels from the wine cellar or greenhouse to the living room on a chilly evening or dining room on a warm summer day.

- Strategically placed thermostats or discreet sensors throughout the home support optimal performance and comfort
- Programming coordinated with motorized shades assists with energy efficiency
- Programming for various times of day and conditions, including when house is unoccupied
- Conveniently controlled via app

## LOW-VOLTAGE ENGINEERING

Low-voltage engineering expertise means you can rest assured that all of your home automation – from lighting and sound to window shades, among other systems.

- Lighting control
- Motorized shades
- Climate control
- Audio/video controls
- Surveillance and security

## POOL CONTROL

Whether you like the energy that comes from doing laps in brisk water or relaxing in steamy warmth under bright stars on a cold winter's eve, your pool and spa can always be pre-programmed to deliver the experience you desire.

## INSTALLATION

- Technicians and programmers work together to ensure proper installation and integration of all home systems
- Rack design, wiring, wire positioning for optimal rack organization, and wire labeling allow for easy servicing
- Projects delivered on time

## DESIGN SERVICES

- Low-voltage engineering
- Creation of integrated technology layout shown in CAD drawings so all parties involved understand all technology involved
- Device layout
- Collaboration with owner, designers, builders, and architects

# AHT GLOBAL

LIFESTYLE TECHNOLOGY

Established in 1996 as Advanced Home Theater, AHT Global is the world's leading technology integration firm specializing in the engineering, installation, programming, and servicing of luxury entertainment and control systems for premiere residences, yachts, and commercial properties. Clients including leading architects, developers, designers, builders, homeowners, and shipyards worldwide are served by five offices across the United States and a sixth in Germany. Over the past two decades, top industry journals, publications, and electronics manufacturers have recognized AHT for superior design, engineering, and integration of technology control systems.
